

"Nothing compares to working closely with students who are eager to learn."

Joanne Pohl, PhD, RN, ANP, FAAN
Nurse Educator

Nursing education... pass it on.

A faculty role has given me the opportunity to wear multiple hats professionally. I love the excitement of teaching and learning with students; knowing I have impact on others' lives. I'm rewarded by seeing bright students pursue their goals, take on leadership roles, work on research and practice ideas that effect patient care and quality of life, and challenge themselves to do their best and experiencing many who actually do it! **Want to learn more about the career advantages of nursing education?**
