

Nursing.  
It's real. It's life.

It's close to  
the action.

What's a Nurse doing on the Baltimore Ravens' sidelines? That's just one of the job perks for Certified Registered Nurse Anesthetist, John Wesolowski. He's the airway management expert the team depends on to prevent an on-field injury from becoming a tragedy. His day job is equally exciting: working closely with a trauma team to care for acutely ill patients arriving by helicopter and ambulance.
